

A LIVING CENSUS OF THE GREATEST CITY ON EARTH

# NEW YORKERS

*Every New Yorker gets a portrait. Even the villains.*

NEW YORKERS by MLow is a living, painted census of New York City: 7,542 characters and counting, from the Subway Samaritan to the Rat King to Midnight itself, in a psychedelic style where flowers bloom with human eyes because the city is watching back. Every one has a number, a story and a place on the map of the five boroughs, and all of it is free to explore at [n3wyorkers.com](https://n3wyorkers.com), along with a walkable museum of 183 New York rooms and a sourced reading room on the city's history.

MLow's work has run on more than 5,000 New York City taxis and in 50 group exhibitions with Art Crush Gallery on public screens across 16 countries in 2026. The collection is sold in named releases, each announced in advance, and no New Yorker is ever sold twice.

CHARACTERS IN THE CENSUS

**7,542**

PAINTINGS, EVERY STATE

**8,145**
